Memorandum

To: Installers of Fire Dept. Key Lock Boxes

From: Fire Prevention

Date: August 1, 2006

Re: Installation locations

In an effort to standardize key lock box locations and assure that they are visible and unobstructed the following specifications shall be used.

The box shall be mounted in a location clearly visible from the street or driveway and adjacent to the entry door that leads directly to the Fire Alarm Control Panel or Remote Annunciator.

The box shall be mounted not less than 42 inches and not more than 54 inches above floor level.

Please contact Fire Prevention when the Lock Box is installed at 970-871-8216 to schedule a time for the key to be locked in the box.

Lock boxes can be purchased from your alarm contractor or get a form from Fire Prevention to order them direct from the manufacturer.

Rapid Entry System

Instant fire department access without damaging the door or building

The Rapid Entry System is designed to help fire departments and businesses work together to preserve lives and property. It eliminates the need for fire department officials to maintain and carry cumbersome key rings with hundreds of building keys.

Here's how the Rapid Entry System works:

1. The building owner purchases the Lock Box of his choice and mounts it securely near the entrance. Fire department officials lock the building keys in the Lock Box.
2. To ensure absolute security, Kidde has developed a flexible program for shipping Lock Boxes directly to building owners. Special security keys are supplied only to authorized fire department officials.
3. When a fire alarm sounds at night or on the weekend, the fire department has instant access to the building. Access is fast, easy and safe without the need for the building owner or tenant to drive to the site after hours.

Kidde — a name you can trust:

Safe and secure. Keys that open the Lock Boxes are provided exclusively by Kidde. Our SupraSafe 2 High Security units are UL certified antitheft devices. All SupraSafes are steel construction with locking systems designed to withstand attack. Optional tamper switches can be integrated with a building's alarm system.

The SupraSafe line offers a variety of sizes, styles and features. Building owners can custom-tailor a Rapid Entry System to meet their needs.

Toll-free product support. You have the resources of the world's largest lock box manufacturer and the backing of Kidde.

Help make it safer for the fire department to protect property and reduce injuries; avoid the expense of replacing a costly door or window due to unnecessary forced entry.

Costly damage of forced entry is eliminated when building keys are stored securely near entrances.
