Total Area of Disturbance (acres):		
CDPHE CDPS Certification Number, if applicable:		
Building Permit Number:		
Project Description:		

Terms and Conditions of Permit

- a. Applicability:** A Steamboat Springs Construction Stormwater Permit (SSCSP) is required when a project's area of disturbance is greater than or equal to one acre, or that is less than one acre, but is part of a larger common plan of development that would disturb, or has disturbed, one acre or more, unless the disturbed areas have been finally stabilized.
- b. Control Measures:** All stormwater discharges must be controlled using properly installed, operated, and maintained control measures to prevent pollutants including trash from entering the city's drainageways and other surface waters within city limits. Inadequate or unmaintained control measures must be corrected immediately.
- c. Compliance:** The project shall not violate Steamboat Springs Revised Municipal Code, City Engineering Standards, or other applicable state and federal requirements.
- d. Stormwater Management Plan (SWMP):** All work must conform to the approved (SWMP). The SWMP shall be updated as necessary to reflect current site conditions and be maintained on site.
- e. Enforcement:** Any violation in any terms or conditions of this permit or the provisions of the Steamboat Springs Revised Municipal Code shall be subject to enforcement actions.
- f. Permit Modification:** If the operator is replaced by a different contractor, city stormwater staff must be notified, and a new stormwater permit shall be applied for. Transfer of property ownership of discrete sub parcels within a SSCSP permitted area by an original permittee does not constitute grounds for transfer of a SSCSP. Until a new SSCSP is issued for the discrete sub parcel, the original, primary permittee remains responsible for management of stormwater within the area encompassed by the original permit.
- g. Permit Termination:** Prior to permit termination, the site must achieve final stabilization which includes the completion of all surface disturbing activities and permanently stabilized with building structures, permanent pavement, landscape rock, landscape pavers, sod, or vegetated areas. Final stabilization of all remaining disturbed and exposed areas requires establishment of a uniform vegetative cover, generally free of weeds, of at least 70 percent of the pre-disturbance level.
- h. Right of Entry:** The city and its authorized agents and employees may enter the permitted site to determine compliance with the terms and conditions of this permit.
- i. Upset:** An upset is an exceptional incident in which there is unintentional and temporary noncompliance with the permit terms and conditions because of factors beyond the reasonable control of the permittee. An upset does not include noncompliance to the extent caused by operational error, inadequate control measures, or lack of preventative maintenance.
- j. Notification:** The permittee shall notify the city as soon as practicable, but no later than 24 hours after becoming aware of any significant spill or discharge of pollutants.

Signature Page

By signing below, Owner and Contractor certify that the information provided on this application is factual to the best of their knowledge. Owner and Contractor understand that this permit is granted under the terms and conditions listed above and special provisions as noted. The Contractor agrees that all applicable city and state permits have been obtained. Permit is not valid until signed by city staff.
