

Ride & Drive Event Charges Up Steamboat Springs

Community Invited to Plug In, Power Up, and Test the Latest EVs

STEAMBOAT SPRINGS, COLORADO-September 11, 2025-Steamboat Springs is putting the power behind the wheel at the fall EV Ride & Drive on Saturday, September 20, offering residents the chance to experience electric vehicles (EVs) firsthand.

The City of Steamboat Springs has once again teamed up with Yampa Valley Sustainability Council (YVSC), Clean Energy Economy for the Region, and Mountain Bus EV to host this interactive community event

“It’s inspiring to see how quickly interest in EVs is growing in our community,” said Ginger Scott Grants and Project Management Specialist. “Over the past several years, we’re working hard to make EV ownership practical here in the Yampa Valley while also supporting the broader goal of reducing emissions.”

The event will have a wide variety of fun cars and trucks to test drive over the five-hour session next week.

Ride and Drive Details

- Saturday, September 20
- 10 AM – 3 PM
- Howelsen Hill Rodeo Grounds
- Free ([advance online sign-up requested](#))

In addition, Mountain Bus EV based in Colorado, will be bringing a fully converted 16 person Glaval shuttle that also has an ADA conversion. Fleet operators, lodging companies, and resort partners are encouraged to stop by and check it out!

Want a better understanding of EVs, then plug into the EV 101 Workshop that same morning from 9am to 10am at the Howelsen Ice Arena meeting room. Explore the differences between EVs and PHEVs, learn how EVs operate, save you money, and the tax rebates and incentives available to help make EVs affordable

With more than 47 public charging stations across Steamboat Springs plus five DC Fast Chargers and high-speed charging along Highway 40, EV travel is more convenient than ever. Ready to plug in to the future? [Head online to register for a test drive, explore resources, and learn how you can help Spur Change.](#)
